

Environmental Policy Statement

Technolution takes care of its clients' needs in the field of complex technological issues with highly demanding requirements. Technolution delivers working solutions in which electronics, programmable logic, and software work in perfect harmony, solutions that are often groundbreaking and that contribute essentially to realizing its clients' objectives.

Technolution is committed to protecting the environment. In addition to treating the environment responsibly itself, Technolution also uses its innovative capabilities to develop new technologies and concepts that protect the environment. Anticipating societal trends and legislation is an integral part of this.

The aims of Technolution's environmental policy are to:

- act responsibly, so that environmental impact is reduced to a minimum;
- develop and use innovative methods/applications to reduce the environmental impact of actions/processes/products/services;
- permanently anticipate and comply with the requirements of environmental legislation and with other requirements that exist in the fields in which Technolution is active.

Technolution has adopted an ISO14001-compliant Environmental Management System. Every year, the Environmental Management System's environmental objectives are evaluated and adjusted. In this way, Technolution implements concrete environmental measures, keeps the Environmental Management System up to date and constantly works to improve it.
