# Environmental Policy Statement

Technolution takes care of its customers' needs in the field of complex technological subjects with highly demanding requirements. Technolution delivers working solutions in which electronics, programmable logic, and software work in perfect harmony. Solutions that are often groundbreaking and that make an essential contribution to realizing the objectives of Technolution's customers.

Technolution is actively committed to protecting the environment. In addition to treating the environment responsibly itself, Technolution also uses its innovative capabilities to develop new technologies and concepts that protect the environment. Anticipating societal trends and regulations is an integral part of this.

Technolution's environmental policy is aimed at:

- Acting responsibly, so that the environmental impact is prevented or kept to a minimum
- Increasing impact through collaboration with stakeholders
- Developing and using innovative methods/applications to reduce the environmental impact
- Continuously anticipating and complying with the requirements of environmental legislation and regulations and other requirements in the fields in which Technolution is active.

Technolution has formalized an Environmental Management System in accordance with ISO14001 and the 'CO2-prestatieladder'. As of 2021, Technolution is certified on level five of the 'CO2-prestatieladder'. This is the highest possible level of this management system.

The Executive Board will ensure that the environmental objectives of the Environmental Management System are evaluated and updated on an annual basis. Technolution will actively communicate about progress to its stakeholders. In this way, Technolution implements concrete environmental measures, keeps the Environmental Management System up to date and constantly works to improve it.
